

BUTTERFLY TABLE TENNIS GOODS CATALOG 2024

GLAYZER

**THE FEELING OF CONTACT, STRENGTHENED ABRASION,
AND RESISTANCE INSPIRED BY THE DIGNICS SERIES**

**NEW!
2023**

GLAYZER

High Performance Rubber That Achieves Both Power And Stable Arc

- Top sheet with improved resistance to abrasion
- Double the resistance of conventional rubbers
- Brings high spin performance
- Development code No. 05 modeled after Dignics 05

**NEW!
2023**

GLAYZER 09C

High Performance Rubber That Achieves Both Adhesion And Momentum

- The characteristics of a sticky rubber such as short control stop near the opponent's net
- Both high tension effect and adhesiveness
- Development code No. 209 modeled after Dignics 09C

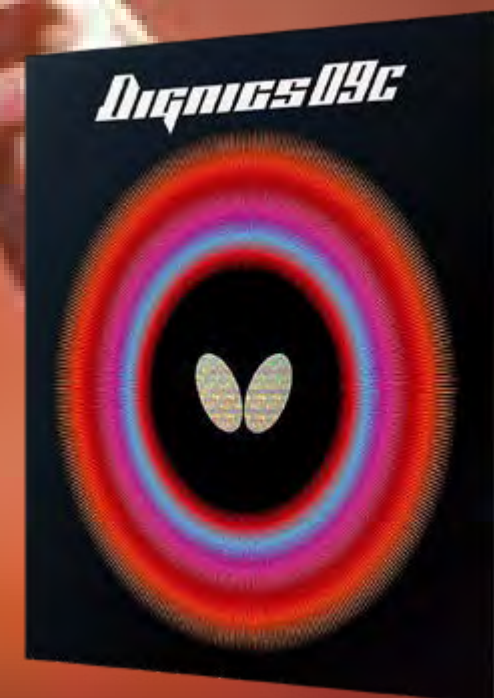

DIGNICS 09C

Realised Compatible Friction And Bounce At High Level

DIGNICS 09C

Dignics guides your play to a more advanced level. The essence is the combination of Spring Sponge X, the advanced version of Spring Sponge which has more elasticity, with the uniquely composed top sheets, now with strengthened abrasion. This is even more true with the newest addition to the line, Dignics 09C. Compatible friction and a high level bounce is realised thanks to the synergy effect between the original top sheet and a rather hard Spring Sponge X (a little harder than Tenergy 05 Hard), to bring out the features of a friction rubber while upgrading the High Tension effect. The pimples code No. 209 delivers topspin and defensive play with high amount of spin as well as ease of over-the-table techniques and counter topspin. DIGNICS 09C, with the upgraded friction High Tension features, guides a player who expects the unique feeling of a friction rubber to new heights.

HIGH TENSION SPRING SPONGE X

DIGNICS

HIGH TENSION

SPRING SPONGE X

Easier to impact than conventional Spring Sponge and with an improved rebound, the new Spring Sponge X provides the increased feeling of holding the ball on the racket and enables to arc the ball even better. This creates more spin and powerful shots, all with a total weight reduced by about three percent, compared to Spring Sponge with the same hardness and thickness.

TENERGY 19

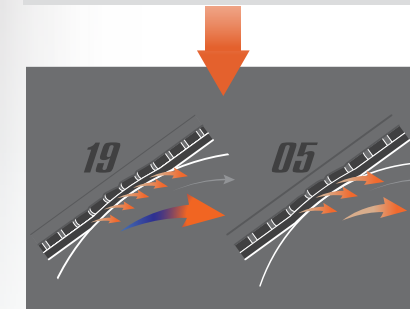

TENERGY 19

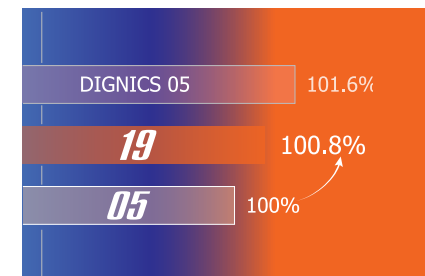

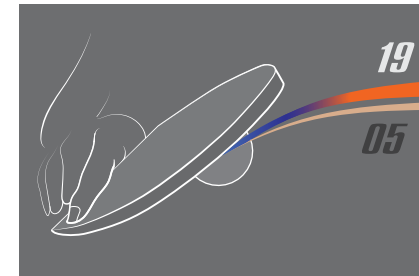

Allocating pimples with smaller diameter densely—this is the answer obtained by accumulating research results. The special pimple shape results in a top sheet which does not easily yield to the opponent's attack. Combining this newly developed top sheet with Spring Sponge, the increased power and sense of holding, a feature of the Tenergy series, are achieved. Tenergy 19 gives a high performance not only for active but also for passive shots against strong returns.

Ball Digging into Sponge
Thin pimples such as no. 219 depress and flatten more easily. Therefore, when the ball hits the rubber, the ball does not slip on the rubber but digs into it. The rubber "holds" the ball in place.

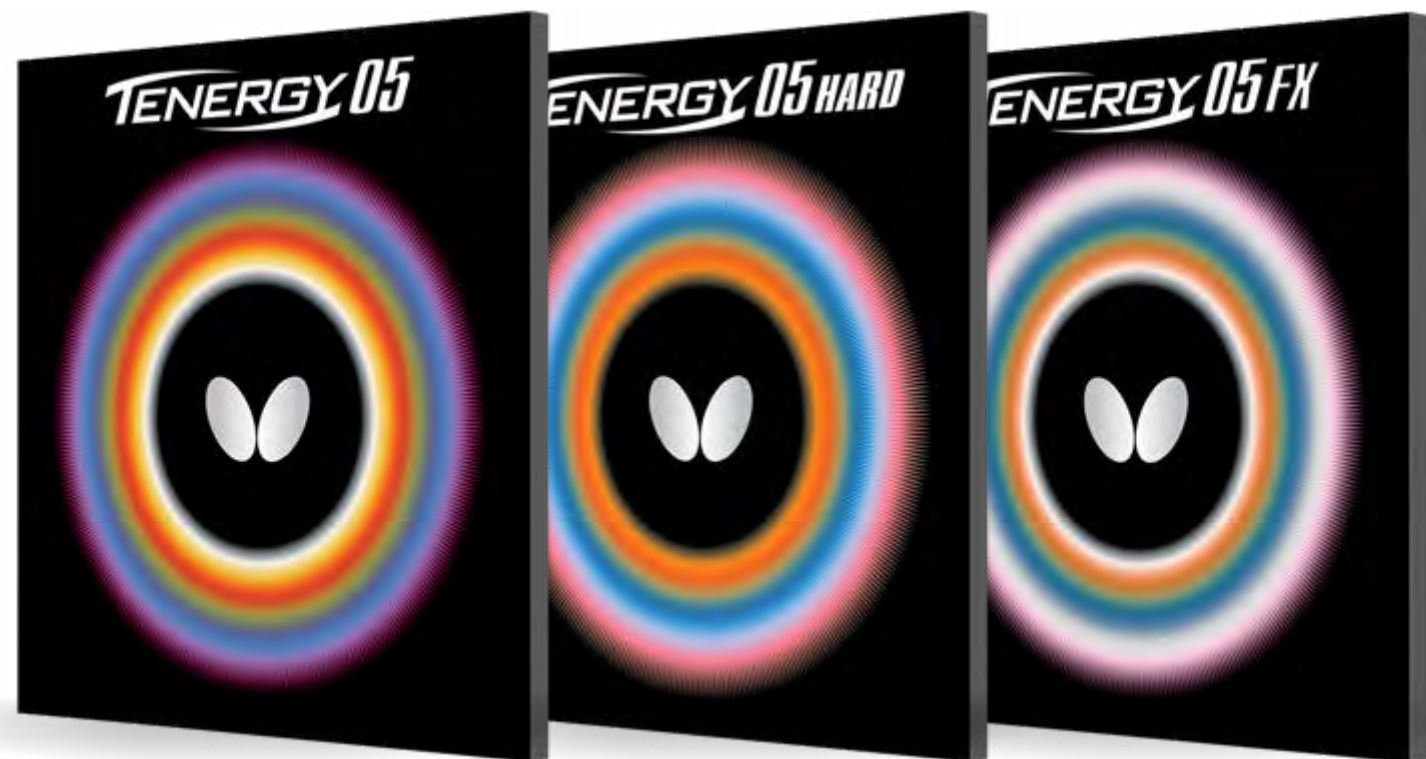

Ball Bouncing Back
The power pushing the ball back against the rubber is generated by each pimple in contact with the sponge. In the case of No. 219, which has thinner pimples, though the power that each pimple pushes back is small, the number of pimples that push the ball back increases because the pimples are densely allocated. As a result, the more power is united, and thus it does not easily yield to the opponent's strong shots.

The weight is similar to Tenergy 05 and is lighter than Tenergy 05 Hard. For players who want to swing faster, Tenergy 19 would be a good choice.

Now, it's in your hand to realize your full potential with Tenergy 19

1. High Tension technology enhances the reaction of the playing surface by adding tension to the rubber molecule itself; this is made possible by applying special substances to rubber materials.

2. Like a coil spring, the Spring Sponge absorbs the incoming energy of the ball and releases it as additional power for the player's own shot. Rubbers with Spring Sponge technology enable shots with high amounts of spin.

ROZENA

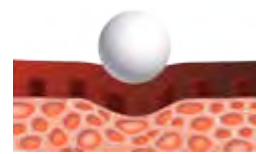

HIGH TENSION

Spring Sponge

High performance rubber developed in the pursuit of “tolerance”

HIGH TENSION

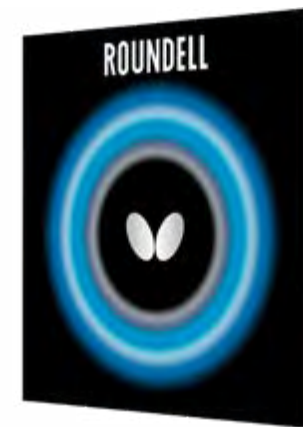

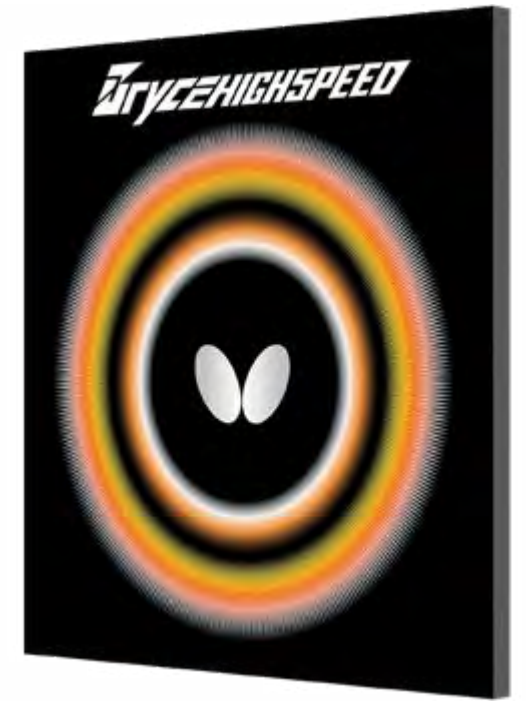

Spring Sponge

A rubber equipped with ground-breaking Spring Sponge technology. Its main feature is high tolerance thanks to the combination of Spring Sponge dyed in rose with an exclusively developed top-sheet. The unique High Tension technology developed by Butterfly enables powerful strokes to be exerted as well as a high level of consistency in play created by compensating for the delicate errors such as blade angle and direction. Rozena follows the quality of its legendary predecessors by demonstrating its effectiveness in play close to the table or at mid-distance.

SAPPHIRA

Easy-to-handle rubber for attack

FLEXTRA

Easy-to-handle rubber for developing players

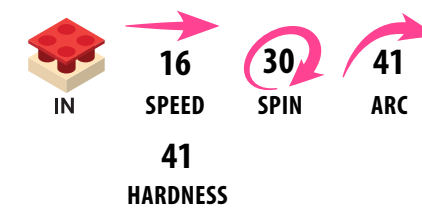

TACKINESS CHOP

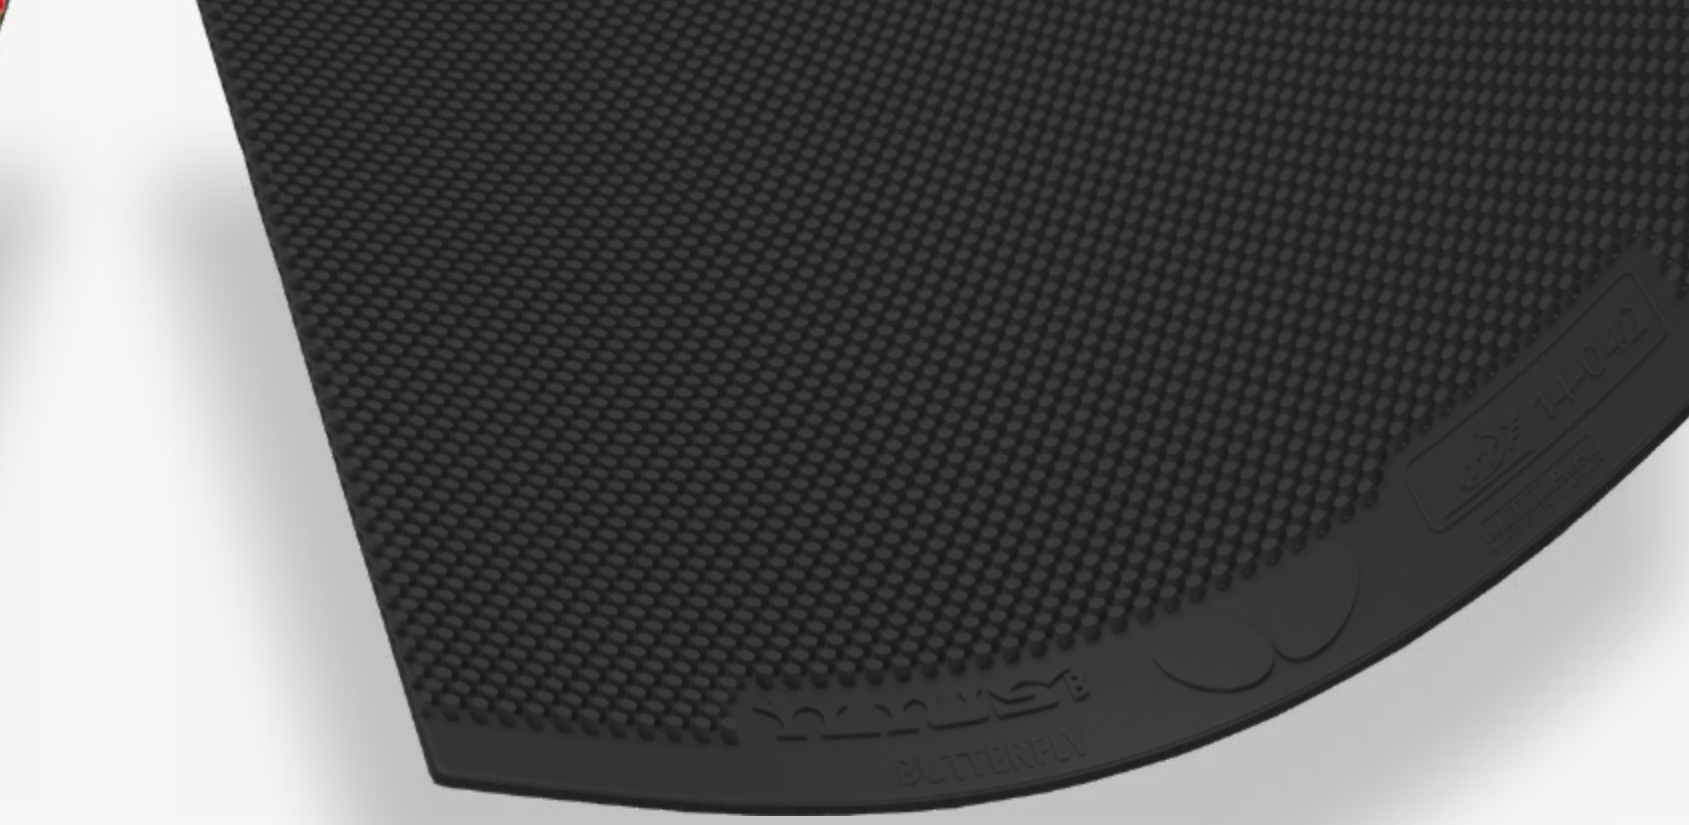

Friction rubber for defensive players

TACKINESS CHOP II

Friction rubber good at spinning

ILIUS S

Long pimped rubber for spin variation and ease to block an opponent's return

Ilius S is the first long pimped rubber with Absorber Sponge Heavy developed by Butterfly. The top sheet is rather hard with pimples whose aspect ratio is at the highest limit permitted to extract the features of the rubber. The combination of the top sheet and Absorber Sponge Heavy makes it easier to play a push stroke and to return an opponent's attack with a low defensive stroke with heavy spin or with minimal spin. The rubber is recommended for defensive players, enabling subtle changes as well as stability in rallies.

 LONG
  7 STABILITY
  6 VARIATION
  45 HARDNESS

Stability 		Variation 	
(Probability of returning balls)		(Probability of unexpected spin/shot)	
7	Total	6	
7	Chop	6	
6	Push	7	
6	Punch	5	
7	Block	6	

Absorber Sponge Heavy: The Sponge absorbs the impact of the ball well whilst maintaining the ease of which the pimples bend. Therefore, the **Ilius S** equipped with this sponge allows for stable chops and pushes with heavier spin.

ILIUS B

Long pimped rubber for variation and ease in attacking

Ilius B is the first long pimped rubber with Absorber Sponge Drop developed by Butterfly. The top sheet is rather hard with pimples whose aspect ratio is at the highest limit permitted to extract the features of the rubber. The combination of the top sheet and Absorber Sponge Drop provides a high performance when playing a short stroke over the table, such as chop block. In addition, innovative attacking and defensive play are both possible, thus making best use of the characteristics of the long pimples, such as a low penetrating backhand with minimal spin.

 LONG
  6 STABILITY
  7 VARIATION
  48 HARDNESS

Stability 		Variation 	
(Probability of returning balls)		(Probability of unexpected spin/shot)	
6	Total	7	
5	Chop	7	
5	Push	8	
4	Punch	7	
8	Block	7	

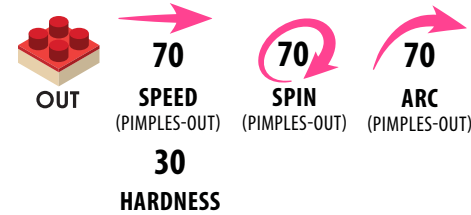

Absorber Sponge Drop: When combined with a stiffer sponge, the pimples are more likely to bend, resulting in a long pimped effect. The **Ilius B** equipped with this sponge demonstrates its qualities and capabilities best when you want to handle an opponent's ball close to the table during shots such as blocks or drop shots.

IMPARTIAL XS

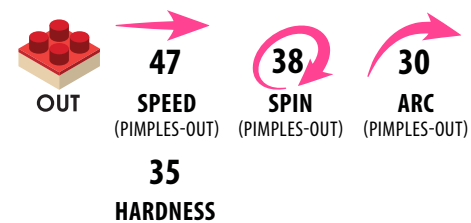

HIGH TENSION

SUPER ANTI

Anti rubber to confuse opponents

BUTTERFLY RUBBER MATRIX

Butterfly Rubber Types

Pimples-in rubber 

Pimples-in rubber
A rubber with a large contact area for the ball, which makes it easy to impart spin.

High Tension pimples-in rubber
A rubber with high elasticity; it is created by impacting tension into the rubber molecule.

High friction pimples-in rubber
A rubber with tackiness of the surface.

High friction High Tension pimples-in rubber
A rubber with high elasticity and friction created by impacting tension into the rubber molecule as well as enabling spin to be imparted on the ball owing to the tackiness of the surface.

Pimples-out rubber 

Pimples-out rubber
A rubber with a small contact area on the ball, which means it is less affected by the opponent's spin as the ball does not stay on the rubber for long.

High Tension pimples-out rubber
A pimples-out rubber with high elasticity created by impacting tension into the rubber molecule.

Rubber for Large 44 mm ball
A pimples-out rubber designed for Large 44 mm ball, enabling a high level of control.

High Tension rubber for Large 44 mm ball
A pimples-out rubber designed for the Large 44 mm ball plays with high elasticity; it is created by impacting tension into the rubber molecule.

Pimples-out rubber (without sponge)
A rubber without sponge; it is light weight and has low elasticity.

Long pimples rubber 

Long pimples rubber
A long pimples rubber with unexpected variety of rotations as the pimples easily transform on contact.

High Tension long pimples rubber
A long pimples rubber which combines variation and elasticity; created by impacting tension into the rubber molecule.

Long pimples rubber (without sponge) 
A long pimples rubber without sponge; it is light weight and has low elasticity.

Anti-spin rubber 
A rubber with less friction; it is less affected by the amount of spin applied by the opponent.

Butterfly Rubber Specifications

A table tennis rubber is made from a combination of a top sheet and a sponge (except for Rubbers without sponge).

Top Sheet

The top sheet is the surface on which the ball hits. Therefore, the performance or characteristics of the top sheet has a significant influence on the game. Butterfly rubbers are available in black and red top sheet colors for each rubber. As stated in the ITTF Rules, "The surface of the covering material on a side of the blade, or of a side of the blade if it is left uncovered, shall be matt, black on one side, and of a bright colour clearly distinguishable from black and from the colour of the ball on the other". This means if black rubber is applied to the forehand side, red rubber must be applied to the backhand side (or vice versa). There is no difference in rubber performance between different top sheet colors.

Sponge

The sponge thickness/hardness varies the performance of the rubber which influences your game.

Sponge Thickness
Each rubber has a lineup of multiple sponge thicknesses. You can choose your sponge thickness depending on the performance you desire.

Thin ← **Sponge** → **Thick**
Light ← Weight → Heavy
Low ← Bounce → High
Defensive Play ← Suited for → Offensive Play

Sponge Hardness
The hardness of the sponge is measured by Butterfly's own standard. The higher the value, the harder it is, and the lower the value the softer it is.

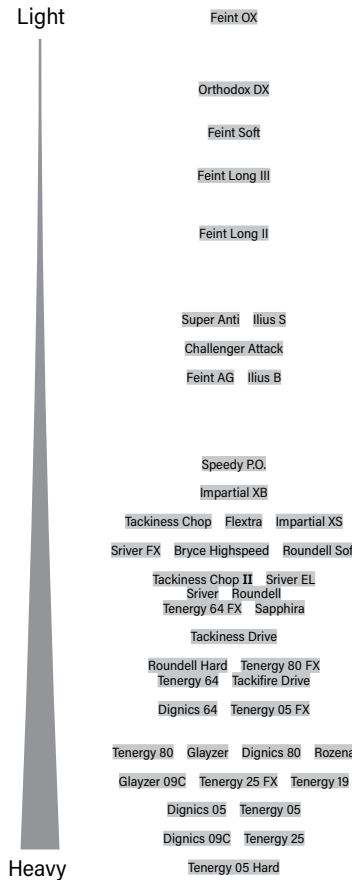

Soft ← **Sponge** → **Hard**
Light ← Weight → Heavy
Low ← Bounce → High
Large Amount ← Ball absorbed → Small Amount
Slow Swing ← Suited for → Fast Swing
Beginners ← Suited for → Advanced Level

Lineup of Sponge Thickness

Max: 3.8–4.0 mm (including top sheet), **2.1:** 1.9–2.2 mm, **1.9:** 1.7–1.9 mm, **1.7:** 1.5–1.7 mm
1.5: 1.3–1.5 mm, **1.3:** 1.1–1.3 mm, **1.1:** 0.8–1.1 mm, **0.5:** 0.4–0.7 mm
Large 2.3: 2.2–2.4 mm, **Large 2.1:** 1.9–2.2 mm, **Large 1.9:** 1.7–1.9 mm

Average Weight Comparison

Butterfly Rubber Performance Index

→ **Speed / Speed (Pimples-out) / Speed (Large):**
Describing the rubber's effect on ball speed in a relative manner measured/evaluated by Butterfly's unique tests. The higher the value, the faster the speed and the more suited it is to offensive play. On the other hand, the lower the value, the slower the speed, and the more suited it is to defensive play.

↻ **Spin / Spin (Pimples-out) / Spin (Large):**
Describing the rubber's effect on the amount of spin generated on the ball in a relative manner measured/evaluated by Butterfly's unique tests. The higher the value, the greater the amount of spin produced. On the other hand, the lower the value, the easier it is to generate balls without spin.

↷ **Arc / Arc (Pimples-out) / Arc (Large):**
Describing the ease of generating a high degree of trajectory on the path of the ball in a relative manner measured/evaluated by Butterfly's unique tests. The higher the value, the more likely it is that the ball will travel in the same direction as the racket swing during topspins. The lower the value, the lower the ball trajectory gets.

⚡ **Stability:** Exclusively for Long pimples, Pimples-out (without sponge) and Anti-spin rubbers. The stability (Probability of returning balls) during chops, pushes, punches and blocks is evaluated on a 10-point scale. "Total" is the average value of evaluation during each technique.

↻ **Variation:** Exclusively for Long pimples, Pimples-out (without sponge) and Anti-spin rubbers. The variation (Probability of unexpected spin/shot) during chops, pushes, punches and blocks is evaluated on a 10-point scale. "Total" is the average value of evaluation during each technique.

* **Speed, Spin & Arc:** (Pimples-out) is for Pimples-out rubbers, (Large) is for Rubbers for Large 44 mm ball, and unless otherwise specified, it is for Pimples-in rubbers.

* **Speed (Large), Spin (Large), Arc (Large), Stability, & Variation:**
The evaluations by the Butterfly Research and Development Department. Use it as a guide to select the Rubbers for Large, Long pimples, Pimples-out (without sponge), and Anti-spin Rubbers.

SUPER ARYLATE-CARBON

Super Arylate-Carbon is the result of many years of research and development. Weaving in more fibers enables a higher bounce than in conventional Arylate-Carbon. The ratio of Arylate and Carbon was adjusted to maintain flexibility and ease of use.

CELLULOSE NANOFIBER CNF

Very thin fibers obtained by finely loosening plant fibers such as wood to Nanometer size, Cellulose Nano Fiber (CNF) enables blades with low vibration, providing the feeling of "holding the ball" to the blade, despite of high reaction values.

SUPER ZL CARBON

Super ZL-Carbon has 1.8 times as much densely woven Carbon-Fibers and ZL-Fibers in mass, as the existing ZL-Carbon by using special technology. The remarkable reaction and control provided by the expanded high-reaction area has taken the blade to the next stage.

ARYLATE-CARBON *Arylate-CARBON*

Arylate-Carbon is a special material created with a woven combination of Arylate and Carbon. Blades using Arylate-Carbon have power, speed, and control.

ZL CARBON *ZL CARBON*

ZL-Carbon is a woven combination of Carbon fiber and ZL-Fiber: Carbon fiber has a high reaction level and ZL-Fiber provides strength, elasticity and lightness. ZL-Carbon, the super fiber, gives the blade a high level of performance.

ZL FIBER *ZL FIBER*

ZL-Fiber has a detailed molecular configuration that is strong and elastic. Its ratio is 10 percent lower than Carbon fiber, thus making the blade both light and with a high performance level.

TAMCA 5000 *TAMCA 5000*

Carbon (TAMCA-5000) is strong and light: six times stronger and one fifth in weight compared with iron and steel. Blades using TAMCA-5000 are light and strong with high elasticity and enable high performance.

CONTROL-ASSIST FIBER *CAFIBER*

The Control Assist Fiber (CAF) consists of thin carbon fiber material and enables the construction of stiffer blades with low vibration without advertingly affecting the total weight too much.

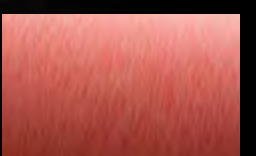

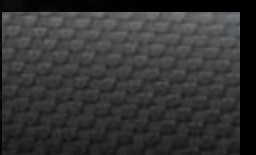

ARAMID CARBON FIBER

Aramid Carbon fiber provides vibration absorption and makes a blade harder, faster, and more precise at the cost of ball dwell time and overall feedback.

KISO HINOKI

Butterfly only uses Hinoki wood cut from trees over 100 years old which grew on the northern side of the inclined plane of the Kiso Mountains, an area where trees are subject to less harmful rays from the sun. The wood grain is of vital importance for the Hinoki blade, a dense grain produces a good bounce.

TIMO BOLL 30TH ANNIVERSARY BLADE

A Blade In Celebration Of The 30 years Of Cooperation Between Timo Boll And Butterfly

11.8 REACTION	10.3 VIBRATION	5 PLY	+	<i>Arylate-CARBON</i>
-------------------------	--------------------------	-----------------	---	-----------------------

Blade size: 157 x 150 mm Blade Thickness: 5.8 mm
Handle: FL 100x24x34 mm
(Length x thickness x end width)
Made in Japan

A new technology has been introduced to the celebratory blade. In pursuit of a less slippery handle, Butterfly has successfully developed a material dedicated to the blade handle whose friction does not easily fluctuate even when exposed to high levels of sweat. Timo has welcomed this material and has already been using at actual tournaments.

The material is named G-Fless; this is where another chapter of history begins.

FAN ZHENDONG BLADE SERIES

FAN ZHENDONG ALC

A Blade Structure Used By Many Top Players Including Fan Zhendong

Made in Japan

BOLL MEZZOFORTE
 Playable In All Game Situations

Blade Size: 158 x 153mm Blade Thickness: 5.0mm
 Handle: FL 100 x 24mm, AN 100 x 23mm, ST 100 x 23mm
 (Length x thickness x width)
 Made in Europe

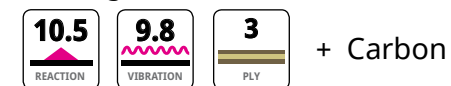

TB5α
 Beginner's Model With Fast Response

Blade Size: 158 x 152mm Blade Thickness: 6.4mm
 Handle: FL 100 x 26 x 33mm
 (Length x thickness x width)
 Made in China

BALSA CARBO X5
 Redesigned With More Power - A Lightweight Classic

Blade Size: 158 x 152mm Blade Thickness: 6.0mm
 Handle: FL 100 x 24, AN 100 x 24mm, ST 100 x 24mm
 (Length x thickness x width)
 Made in Europe

BALSA CARBO X7
 Lightweight, 7-ply Balsa Blade

Blade Size: 158 x 152mm Blade Thickness: 7.5mm
 Handle: FL 100 x 24, AN 100 x 24mm, ST 100 x 24mm
 (Length x thickness x width)
 Made in Europe

MAZE MAGIC
 Characteristic Touch And Control Needed For Spin Oriented Play

Blade Size: 159 x 151mm Blade Thickness: 5.9mm
 Handle: FL 100 x 24mm, AN 100 x 24mm, ST 100 x 24mm
 (Length x thickness x width)
 Made in Europe

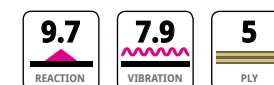

OMAR ASSAR
 Named After Egyptian Star, Omar Assar

Blade Size: 157 x 150mm Blade Thickness: 5.8mm
 Handle: FL 100 x 25 x 34mm, AN 100 x 25 x 32mm,
 FL XL 104 x 25 x 36mm, ST 100 x 23 x 28mm
 (Length x thickness x width)
 Made in Europe

ANDRZEJ GRUBBA
 A Classic Allround Blade

Blade Size: 159 x 151mm Blade Thickness: 5.7mm
 Handle: FL 100 x 25 x 34mm, AN 100 x 25 x 34mm, ST 100 x 25 x 28mm
 (Length x thickness x width)
 Made in Europe

DIODE V

DIODE V

Defensive model but designed also for attacking play

Blade size: 165 × 156mm Blade thickness: 5.7mm
 Handle: FL 100 × 24 × 34mm, ST 100 × 23 × 28mm
 (Length × thickness × end width)
 Made in Japan

INNERSHIELD LAYER ZLF

Defensive model with ZL-Fiber

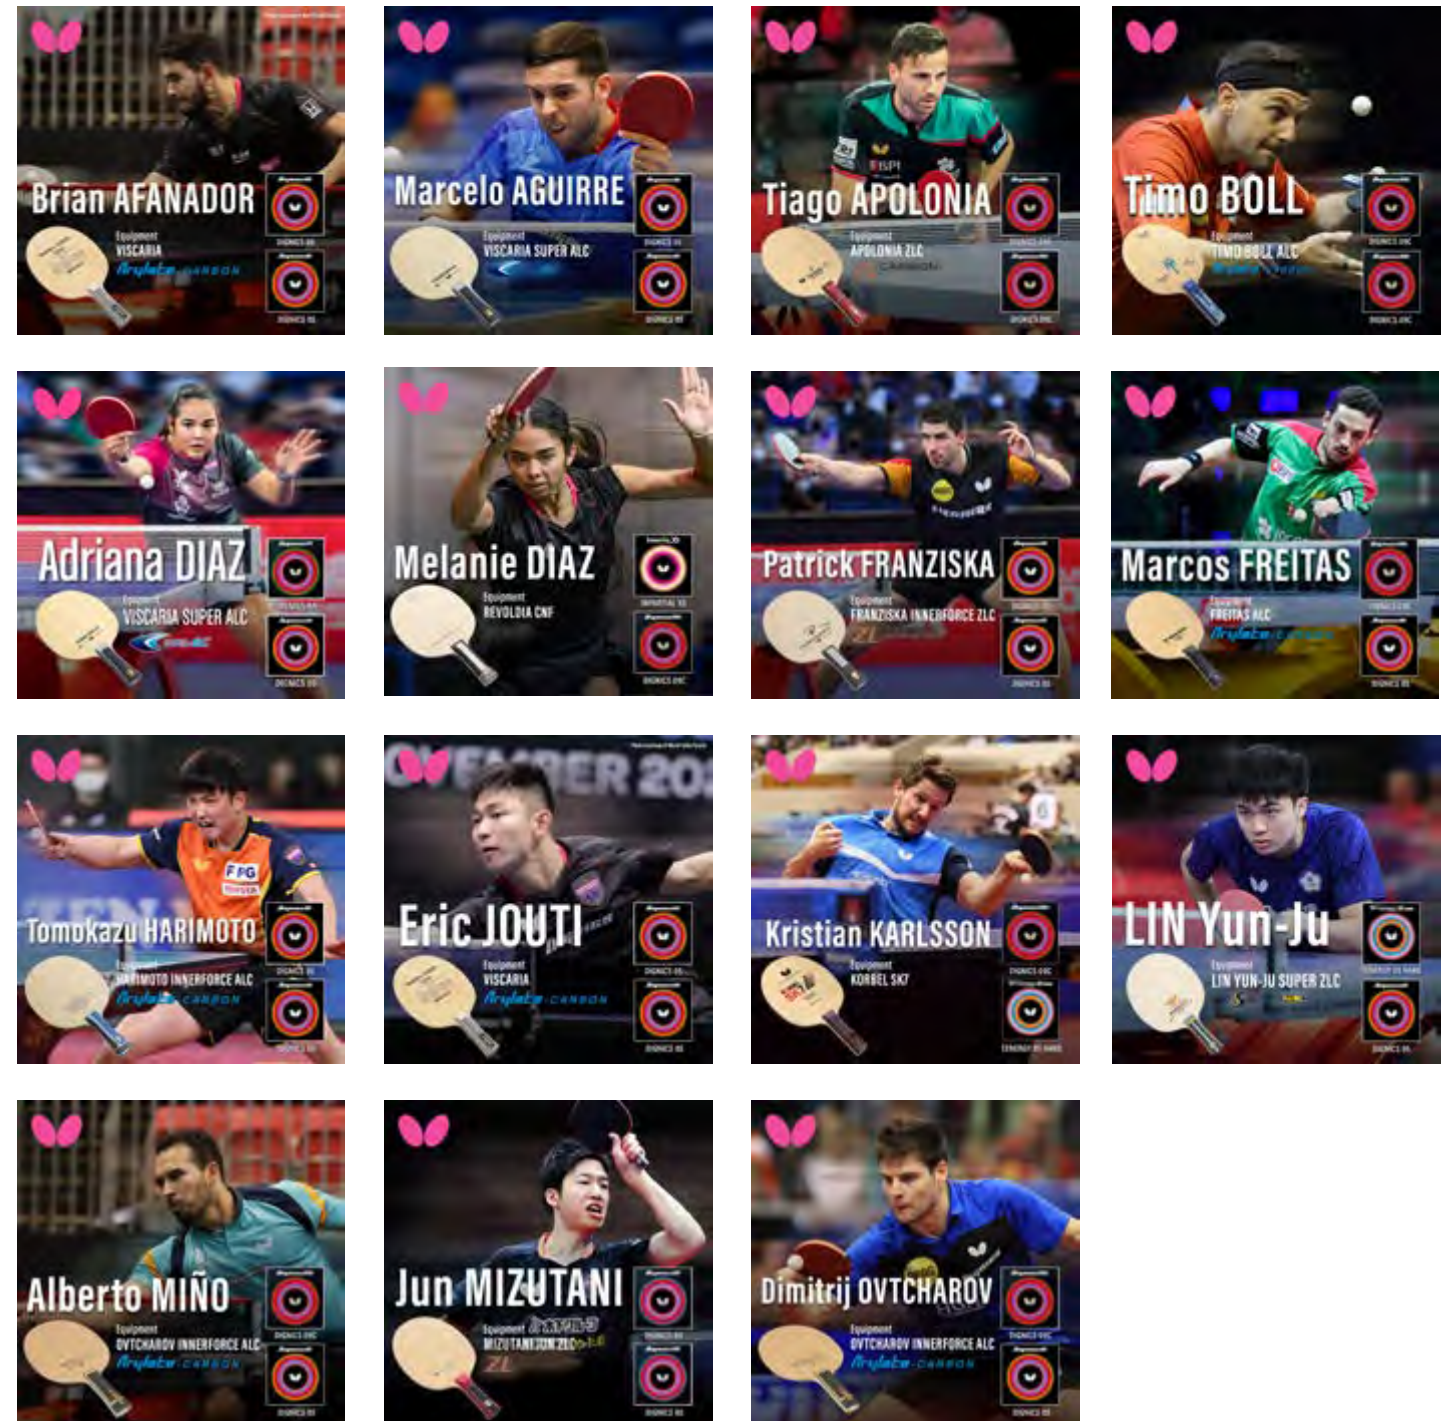

Blade size: 166 × 155mm Blade thickness: 5.1mm
 Handle: FL 100 × 24 × 34mm, ST 100 × 23 × 30mm
 (Length × thickness × end width)
 Made in Japan

BUTTERFLY WORLD CLASS RACKETS

Pro-Line Rackets are comprised of the individual blade and rubber component pieces and professionally assembled by our staff. The below rackets are the identical blade and rubber combinations used by some of the best players in the world [as of September 2023]. Can't find a racket that suits your style of play? Choose your own blade and rubber combination and we will assemble it for FREE

1-ply Hinoki

The weight of blades differs according to the condition in humidity and temperature

The numbers are based on the research conducted by the Butterfly Research and Development Department through January 2023

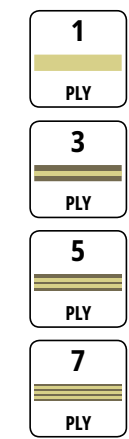

BUTTERFLY BLADE MATRIX

REACTION PROPERTY

VIBRATION PROPERTY

Plywood Composition

Reaction Property

The reaction property is the quantified value illustrating the base speed of a blade. A low reaction property signifies the lower speed of the ball after contact with the blade. A high reaction property signifies the higher speed of the ball after impact.

Vibration Property

The vibration property is the quantified value illustrating the feeling of a blade on impact. A low vibration property in general signifies slower vibration on ball contact and denotes a blade with a softer touch. A high vibration property in general signifies faster vibration of the blade on contact with the ball and denotes a blade with a harder touch.

Handle Shape (Shakehand)

- FL** Flare: A handle that widens towards its end and fits in the palm of the hand. A very popular choice for players around the world
- ST** Straight: The straight handle enables to change a way of a grip according to the play
- AN** Anatomic: Wave-shape handle fits in the palm and provides stability
- SI** Straight Incline: The width is straight and the thickness becomes thicker toward the base of the handle

Blade Shape (Penhold)

- CS** Chinese penhold blade
- S** Angular penhold blade
- R** Round-angular penhold blade

Heavy

PENHOLD BLADES

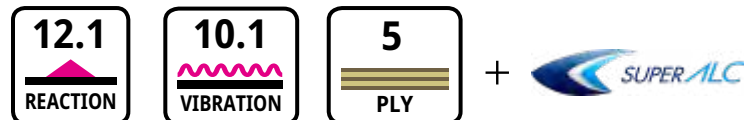

FAN ZHENDONG CS SERIES

FAN ZHENDONG SUPER ALC CS

Combining Suppleness And High Bounce

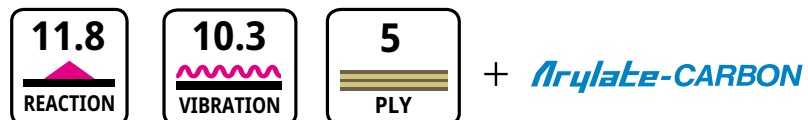

Blade size:161 x 150 mm Blade Thickness: 5.7 mm
Handle: 82 x 24 x 32mm
(Length x thickness x end width)
Made in Japan

FAN ZHENDONG ALC CS

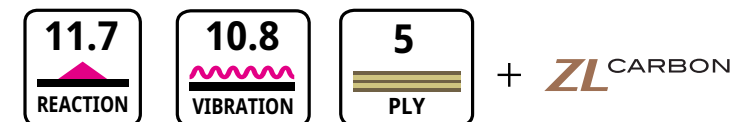

A Blade Structure Used By Many Top Players Including Fan Zhendong

Blade size:161 x 150 mm Blade Thickness: 5.8 mm
Handle: 82 x 24 x 32mm
(Length x thickness x end width)
Made in Japan

FAN ZHENDONG ZLC CS

Power And Stability

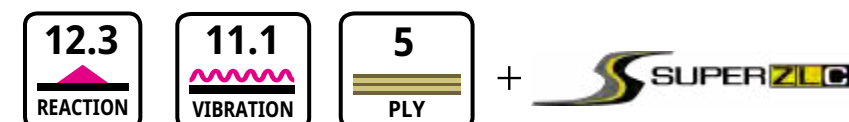

Blade size:161 x 150 mm Blade Thickness: 5.5 mm
Handle: 82 x 24 x 32mm
(Length x thickness x end width)
Made in Japan

FAN ZHENDONG SUPER ZLC CS

Power And Stability At A High Level

Blade size:161x 150 mm Blade Thickness: 5.6 mm
Handle: 82 x 24 x 32mm
(Length x thickness x end width)
Made in Japan

FAN ZHENDONG CNF CS

Power And Stability At A High Level

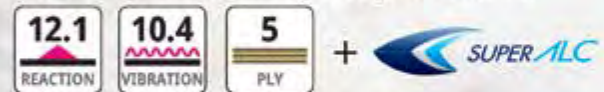

Blade size:161x 150 mm Blade Thickness: 5.7 mm
Handle: 82 x 24 x 32mm
(Length x thickness x end width)
Made in Japan

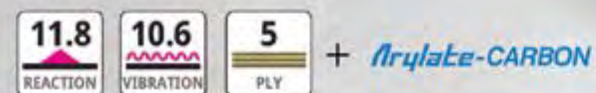

VISCARIA SUPER ALC - CS
The first model with super Arylate-Carbon

Blade size: 158 x 150mm Blade Thickness: 5.7mm
Handle: 85 x 22 x 31.5mm (Length x thickness x end width)
Made in Japan

VISCARIA - CS
A Chinese penhold blade with high bounce and stability

Blade size: 158 x 150mm Blade Thickness: 5.8mm
Handle: 85 x 22 x 31.5mm (Length x thickness x end width)
Made in Japan

**HARIMOTO TOMOKAZU
INNERFORCE SUPER ZLC - CS**

The first Innerfiber model with Super ZL-Carbon

Blade Size: 161 x 150mm Blade Thickness: 6.2mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

**HARIMOTO TOMOKAZU
INNERFORCE ZLC - CS**

Innerfiber ZL-Carbon blade with increased power

Blade Size: 161 x 150mm Blade Thickness: 5.7mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

**HARIMOTO TOMOKAZU
INNERFORCE ALC - CS**

Well-balanced model with bounce and usability

Blade Size: 161 x 150mm Blade Thickness: 6.0mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

**INNERFORCE
LAYER ZLF - CS**
High stability achieved thanks to the thin blade

Blade Size: 161 x 150mm Blade Thickness: 5.3mm
Handle (Length x thickness x end width): 82 x 23 x 32mm
Made in Japan

**INNERFORCE
LAYER ZLC - CS**

High-performance Chinese penhold balancing power and control

Blade Size: 161 x 150mm Blade Thickness: 5.7mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

FALCIMA - CS
Designed with a good balance of bounce, stability, and weight

Blade Size: 161 x 150mm Blade Thickness: 6.0mm
Handle (Length x thickness x end width): 82 x 23 x 32mm
Made in Japan

SK CARBON - CS
Easy to use carbon blade

Blade Size: 161 x 150mm Blade Thickness: 5.2mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

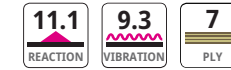

TIMO BOLL CAF - CS
Highly-balanced model with CA-Fiber

Blade Size: 161 x 150mm Blade Thickness: 5.7mm
Handle (Length x thickness x end width): 82 x 23 x 32mm
Made in Japan

SK7 CLASSIC - CS
Chinese penhold of all-wood 7-ply

Blade Size: 161 x 150mm Blade Thickness: 6.8mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

INNERFORCE LAYER ALC.S - CS
Improved ease of imparting spin on the ball

Blade Size: 161 x 150mm Blade Thickness: 5.5mm
Handle (Length x thickness x end width): 82 x 24 x 32mm
Made in Japan

SHAMADA
Easy to use your wrist

Blade Size: 160 x 150mm Blade Thickness: 7.5mm
Handle (Length x thickness x end width): 80 x 24 x 28mm
Made in Japan

CHINESE REAL
Distinguished high speed

Blade Size: 158 x 150mm Blade Thickness: 7.7mm
Handle (Length x thickness x end width): 82 x 25 x 33mm
Made in Japan

CYPRESS G-MAX

Best one-ply Kiso Hinoki

Blade size: 163×135mm Blade thickness: 10.0mm
 Handle (Length × height × end width (top, bottom)): 92×20×(15, 21)mm
 Made in Japan

CYPRESS V-MAX

High-end one-ply Kiso Hinoki

Blade size: 163×135mm Blade thickness: 10.0mm
 Handle (Length × height × end width (top, bottom)): 92×20×(15, 21)mm
 Made in Japan

CYPRESS T-MAX

One-ply Kiso Hinoki recommended for a wide range of players

Blade size: 163×135mm Blade thickness: 10.0mm
 Handle (Length × height × end width (top, bottom)): 92×20×(15, 21)mm
 Made in Japan

GARAYDIA REVOLVER

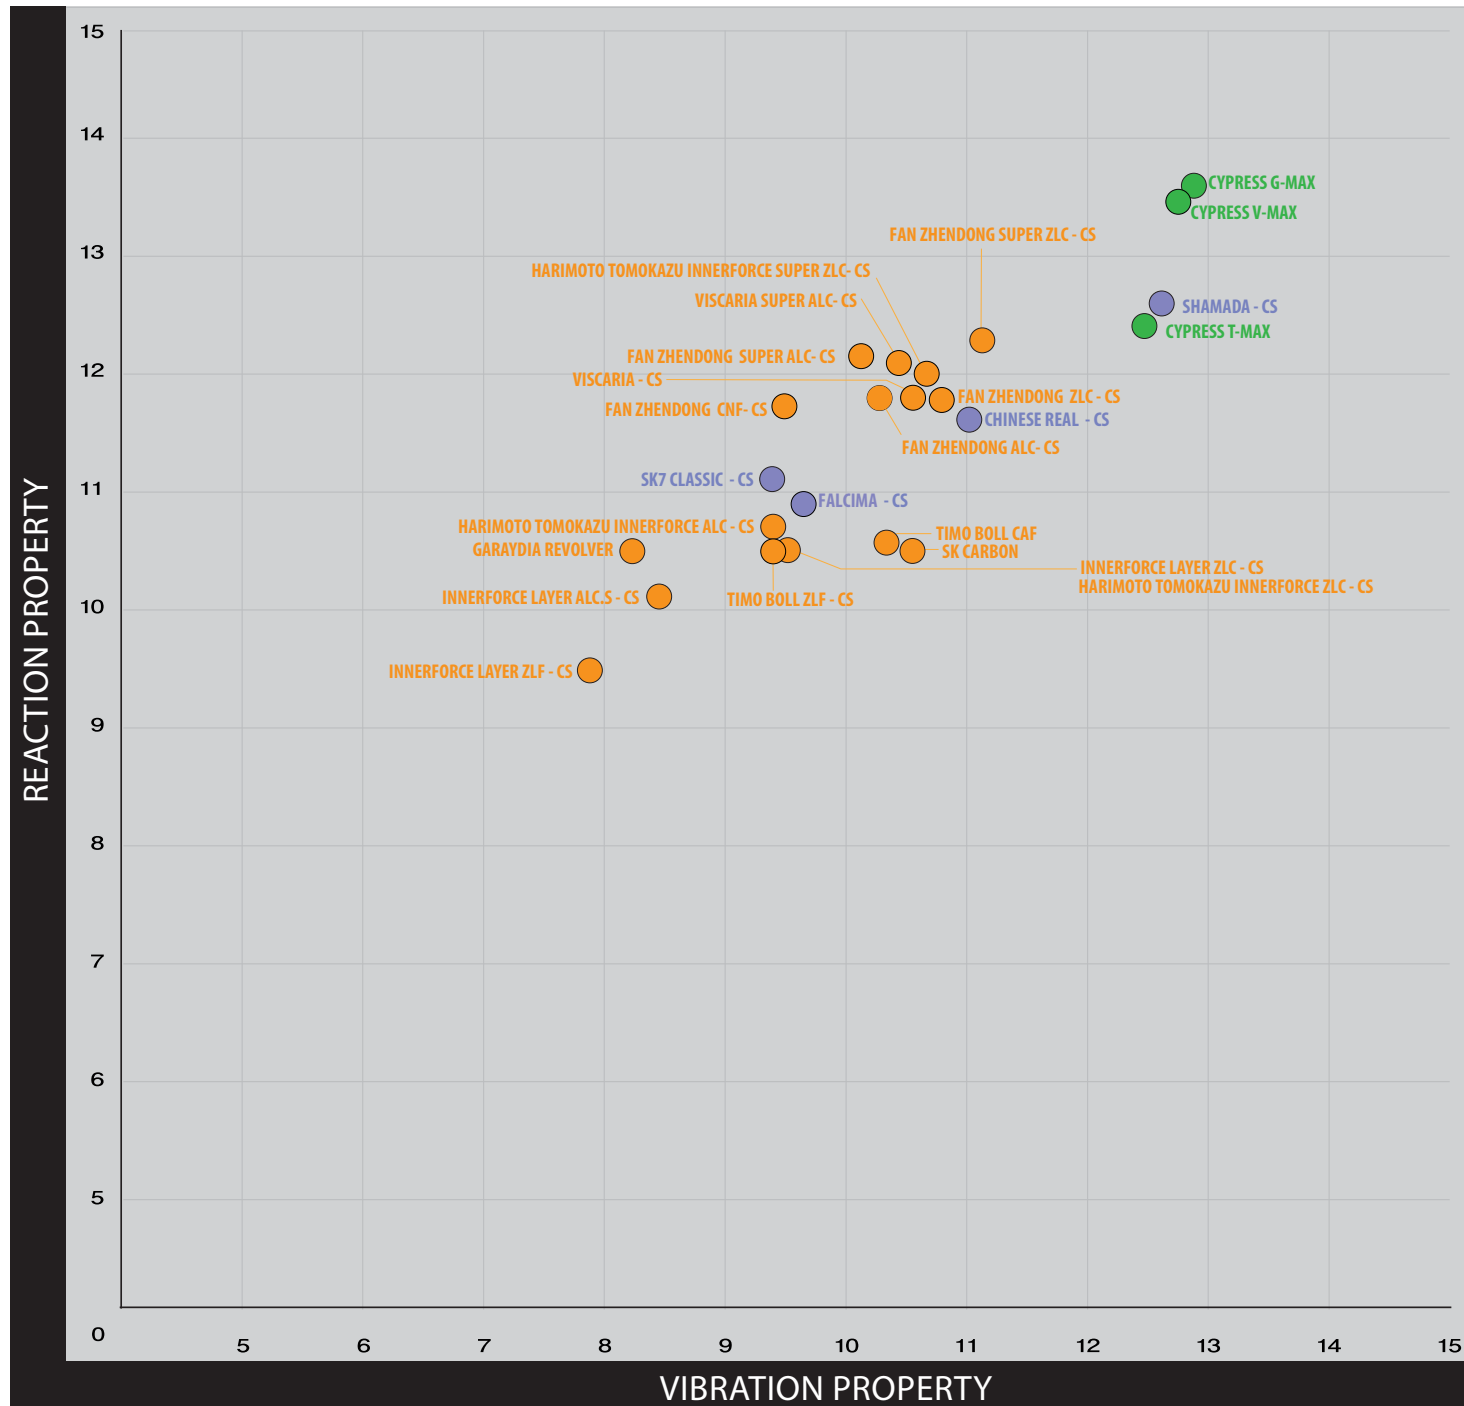

Combination penhold for attack and defense close to the table

Blade size: 161×141mm Blade thickness: 6.4mm
 Handle (Length × height × end width (top, bottom)): 86×16×(20, 20)mm
 Made in Japan

Sutairu Shirt **NEW!** 2023

Asian designs always fascinate with their conspicuousness, full-surface prints are always an eye-catcher in combination with the right choice of colour. The Sutairu and Sutairu Lady shirts are the perfect combination of style and functionality. The breathable, wear-friendly material in sublimation design is moisture-regulating and thus always offers a pleasantly dry feeling.

WHAT'S NEW WITH THE AMICUS!

FETHOMANIA

Fethomania is a special educational and training opportunity for Butterfly Amicus Prime owners to learn more about training on their robots. Presented by Bowmar Sports, the official Butterfly distributor for North and South America and featuring Stefan Feth, the US Men's National Team Coach and Larry Thoman, the Robot Guru, with over 30 years working in the table tennis robot industry.

Offered once per month to any person who has purchased an Amicus table tennis robot, each session includes a brief training session with Stefan with one or more drills that you can play on your robot to improve your table tennis skills.

The drills will be demonstrated and Stefan will live coach on technique and give specific points to work on. This is a unique

opportunity to get valuable insights from a top international level coach. Stefan will also offer a variety of fundamental coaching tips each session. At the end of each Fethomania session, participants can ask Larry any questions they may have about their robots, including set-up, design, functions, differences in models, replication of particular shots, resolving issues, and maintenance.

We will provide links to Amicus Prime drill files that you can download to your own Prime Tablet so you can do those same drills on your own Prime robot. If you are

not a Prime owner, we will provide a link to a chart showing the settings for each drill for other models.

Come join us for a rewarding, illuminating Fethomania session. You're sure to discover how to get the most from the investment you've made in your Amicus robot.

WAIT Function

WAIT allows the player to practice a serve against the robot and then practice 3rd ball attack against a return from the robot.

SECTOR Function

SECTOR allows the placement to be randomized for a particular ball within an exercise (all the other random functions apply to all balls within an exercise).

New & Improved Tablet

The new tablet has a more powerful processor, more memory, larger screen, more responsiveness, and a newer OS. New Tablet Holder accommodates the larger size of the new tablet.

Amicus Prime Robot

The new AMICUS PRIME sets out to redefine the possibilities of a table tennis robot and will excite fans all over the world. The innovative PRIME is controlled wirelessly via Bluetooth technology from the AMICUS app running on either the included tablet computer or any smartphone or tablet operating iOS or Android. AMICUS app software offers a multitude of interactive content, improved and added to with regular updates. Creating exercises, changing spin, speed, placement and trajectory has never been easier. Pre-saved exercises created by professional players and coaches are playable at the press of a button with in-app videos by stars such as Timo Boll just waiting to show the correct execution and provide useful additional information from his regular training with the AMICUS robot. Get acquainted to our AMICUS flagship model and discover the new possibilities of the most tireless, and always ready, training partner you will find.

Amicus Expert

Amicus Expert

The new AMICUS EXPERT combines the skills of both predecessors ADVANCE and PROFESSIONAL. With 99 memory slots, up to seven individual balls per exercise and precise control over trajectory, placement, speed and spin of each ball, AMICUS EXPERT further features up to 100 balls per minute, cycle and random functions as well as automatic adjustable delay between each ball to create exercises based on real game situations – even with serve!

AMICUS EXPERT offers 20 pre-installed exercises created by Butterfly coach Richard Prause for you to start training on the highest level as well as a remote control for Start/Stop, sampling balls and adjusting ball frequency.

Special features of AMICUS EXPERT:

- * Ball frequency of up to 100 balls per minute Spin, speed, trajectory, and placement can vary from ball to ball.
- * Stores up to 99 drills of up to 7 balls each.
- * Pre-programmed with 20 drills created by German Butterfly Coach Richard Prause
- * Pre-programmed drills can be modified or replaced.
- * Sample function lets you test individual balls within a drill.
- * Cycle function lets you easily incorporate interval training in your table tennis practice sessions.
- * Automatic frequency control to provide the most realistic timing between shots in a drill.
- * Connected with help of an easy and secure thin cable.
- * Key-fob-like remote control (small, lightweight and easy to fit in pocket).

Amicus Start

AMICUS START

The new AMICUS START is a high-quality table tennis robot featuring precise and durable hardware combined with a user-friendly panel. Allowing for up to six balls per exercise, AMICUS START allows you to adjust individual placement and select either topspin, sidespin or backspin for the exercise – even float balls without spin are possible. The Random function provides a realistic playing experience sure to improve footwork and technique alike.

Special features of AMICUS START:

- * Simple interface
- * Up to 6 balls per drill, all balls with same spin, speed, & trajectory
- * Ball frequency of up to 100 balls per minute
- * Left-right Placement can change for each ball in a drill.
- * Connected with help of an easy and secure thin cable.
- * Optional: Key-fob-like remote control (small, lightweight and easy to fit in pocket).

Amicus Prime Upgrade Kits

Details

Convert Your Amicus Professional, Advance, Or Basic Model To A Prime With Android Tablet Controller.

Wirelessly Connect Controller to Robot Over Bluetooth. Get Software Updates Over The Internet. See Top View & Side View Diagrams Showing Complete Drill Info. Watch Video Demonstrating The Drill. Rearrange Drills; Customize Drill Names; Use Search To Find Desired Drill; Send Drills To Friends. Add, Delete, Reorder, & Duplicate Shots In A Drill. Use Mirror To Instantly Reverse L/R Placements. Update your Amicus Professional, Advance, or Basic table tennis robot to the latest technology! With this simple, **easy-to-install kit**, give your old model Amicus robot the same functionality as the top-of-the-line Amicus Prime. Control your updated robot with the supplied **Android tablet** that connects wirelessly to your robot. Join a Wi-Fi network to **share drills** with friends or update software and firmware to fix bugs and add new features.

The **engaging visual interface** of the Prime provides side view and top view diagrams of all shots in a drill along with quick-to-decipher information on spin type, spin amount, ball speed, shot order, placement, and height for **up to 10 different shots in a drill**. Or **watch a video** of Butterfly's Tiago Apolonia from Portugal, flawlessly demonstrate the drill. Vary the spin, speed, placement, height, and/or timing of each shot. Or randomize shots for human-like play. Flip the **Mirror switch to reverse L/R placements** so a drill runs correctly for left-hand or right-hand players, or to instantly create a new drill variation. Or sequence together multiple drills into a game-like routine.

Once you have your drill fine-tuned to your specific needs, save it for quick recall. Give it any name you want and place your drills in any order. Use search to quickly locate your drill. The newest software version also saves the ball frequency with the drill; the first time this feature has been available on any Amicus model. The **tablet gives you storage for virtually unlimited number of drills** and you can increase storage with micro SD cards.

This upgrade kit consists of an easy-to-install converter box that attaches to the serial port of your Base. It includes a Prime Tablet with Tablet Holder, Remote Switch, Owner's Manual, and charger. Once attached, control your robot with the pre-installed Amicus app and start/stop an exercise and adjust ball frequency with the included remote switch.

If you want the best ping pong robot, this is it. Butterfly Amicus Prime = No Compromises.

Feature	AMICUS Start	AMICUS Expert	AMICUS Prime
Controller	Wired Control Panel	Wired Control Panel	Android Tablet (supplied) with app pre-installed. Can install app on any Android or iOS device.
Wireless (RF) Remote	Yes (optional). Has Start, Stop, & Frequency +/- buttons. Can connect up to 4 remotes to a robot.	Yes (supplied). Has Start, Stop, & Frequency +/- buttons. Can connect up to 4 remotes to a robot.	Yes (supplied). Has Start, Stop, & Frequency +/- buttons. Can connect up to 4 remotes to a robot.
Programmable	Up to 6 shots. Position only can be changed. Spin, speed, and height remain same.	Up to 7 shots. Adjust speed, spin type, spin amount, height, and position for each shot.	Up to 10 shots. Adjust speed, spin type, spin amount, height, timing, & position of each shot.
Memory Capacity	None	Save up to 99 drills, from 1 to 7 shots each.	Virtually unlimited memory. 16Gb included. Can be extended with Micro SD (TF) card.
